Bio 1M: Phenetics supplement

How to make a phenetic tree in real life

- 1. Join the two open nodes that are closest to each other

  – Shortest distance

- 2. They are no longer active. Make a new node halfway between them

  – Average the traits
  – This step is conceptually simple and practically tricky

- 3. Go back to step 1

How to make a phenetic tree in this course

- 1. Join the two open nodes that are closest to each other

  – Shortest distance
